## **Editorial**

The year 2022, which was declared by the Polish Senate as the Year of Botany, has just passed. Although it did not bring any significant changes for the better in Polish botany, the fact is worth mentioning.

At a more local level, in 2022 we celebrated the 90th anniversary of the Department of Plant Cytology and Embryology of the Jagiellonian University, where the editorial office of our journal has been located from the very beginning. So far, all the chief editors of *Acta Biologica Cracoviensia Series Botanica* have been employees of this Department.

Moreover, the year 2022 brought a painful loss. In September Professor Olga Erdelska, aged 89, passed away. She was an outstanding scientist, an expert in plant embryology, physiology and ecology. She was a member of the Editorial Board from 1996, a person known and respected by both the members of the editorial team and numerous authors whose papers have been published in *Acta Biologica Cracoviensia Series Botanica*.
