

ACTA BIOLOGICA CRACOVIENSIA

SERIES BOTANICA

Vol. 51 suppl. 1

2009

ABSTRACTS

12th National Conference
'*In vitro* Cultures, Poznań 2009'

September 9–11, 2009
Poznań, Poland

Polish Academy of Sciences – Cracow Branch
Jagiellonian University
Polish Academy of Arts and Sciences

ACTA BIOLOGICA CRACOVIENSIA

Series Botanica

The Official Publication

of the Biological Commission of the Polish Academy of Sciences – Cracow Branch
and the Jagiellonian University
published jointly with the Polish Academy of Arts and Sciences

DEVOTED TO PLANT ANATOMY, MORPHOLOGY, CYTOLOGY, GENETICS, KARYOLOGY,
EMBRYOLOGY, TISSUE CULTURE, PHYSIOLOGY AND BIOSYSTEMATICS

ESTABLISHED 1958

© Polish Academy of Sciences and the Jagiellonian University, Cracow 2009

The edition of this supplement is financed by the Polish Academy of Arts and Sciences.

ACTA BIOLOGICA CRACOVIENSIA Series Botanica is published twice a year by the Polish Academy of Sciences – Cracow Branch, ul. św. Jana 28, 31-018 Cracow, Poland and the Jagiellonian University in Cracow, ul. Gołębia 24, 31-007 Cracow, Poland

Set and printed by KON Tekst Publishing House, Bobrzeckiej 9, 31-216 Cracow, Poland

Managing editor: Monika Tuleja

Technical editor: Wojciech Marcinek

Editor

ELŻBIETA KUTA

*Department of Plant Cytology and Embryology, Jagiellonian University, ul. Grodzka 52
31-044 Cracow, Poland, Tel./Fax: +48-12-422 81 07, e-mail: e.kuta@iphils.uj.edu.pl*

Editorial Secretary

MONIKA TULEJA

*Department of Plant Cytology and Embryology, Jagiellonian University, ul. Grodzka 52
31-044 Cracow, Poland, Tel./Fax: +48-12-422 81 07, e-mail: abc@iphils.uj.edu.pl*

Editorial Board

HARVEY E. BALLARD, JR. *Department of Environmental and Plant Biology, Ohio University, Porter Hall, Athens, Ohio 45701, USA, e-mail: ballardh@ohio.edu*

Molecular approaches in plant systematics, ecology and evolution

TATYANA B. BATYGINA. *Komarov Botanical Institute, Department of Embryology and Reproductive Biology, Prof. Popov St. 2, 197376 St. Petersburg, Russia, e-mail: batygina@tb1390.spb.edu*
Plant embryology

JÓZEF BEDNARA. *Department of Plant Anatomy and Cytology, Maria Curie-Skłodowska University, ul. Akademicka 19, 20-033 Lublin, Poland, e-mail: ancyt@biotop.umcs.lublin.pl*
Plant embryology

BORUT BOHANEČ. *Biotechnical Faculty, University of Ljubljana, Jamnikarjeva 101, 1000 Ljubljana, Slovenia, e-mail: borut.bohanec@bf.uni-lj.si*

Plant biotechnology

MAURO CRESTI. *Dipartimento di Biologia Ambientale, Sezione Botanica, Università di Siena, Via P. A. Mattioli 4, I-53100 Siena, Italy, e-mail: cresti@unisi.it*

Sexual plant reproduction; pollen biology; pollen tube; pollen-stigma-style-ovule interaction; cytoskeleton

MARIA CHARZYŃSKA. *Department of Plant Anatomy and Cytology, Warsaw University, ul. Miecznikowa 1, 02-096 Warsaw, Poland, e-mail: marlig@biol.uw.edu.pl*

Cytoembryology of flowering plants; anther and pollen development (structural and molecular aspects)

MARTA DOLEŻAŁ. *Academy of Physical Education, Chair of Hygiene and Health Protection, Al. Jana Pawła II 78, 81-571 Cracow, Poland, Fax: +48-12-648 17 07*

General and medical mycology; health promotion; medical microbiology

FRANCISZEK DUBERT. *Department of Plant Physiology, Polish Academy of Sciences, ul. Podtużna 3, 31-239 Cracow, Poland, e-mail: dubert@jfr-pan.krakow.pl*

Physiology of plant growth and development

OL'GA ERDELSKÁ. *Institute of Botany, Slovak Academy of Sciences, Dúbravská 14, 84223 Bratislava, Slovak Republic*

Plant embryology; developmental biology

JOHANN GREILHUBER. *University of Vienna, Institute of Botany, Rennweg 14, 1030 Vienna, Austria, e-mail: johann-greilhuber@univie.ac.at*
Plant karyology

JOHN M. HERR, Jr. *University of South Carolina, Department of Biological Sciences, Columbia, South Carolina 29208, U.S.A., e-mail: herr@biol.sc.edu*

Plant morphology; anatomy; embryology

ANDRZEJ JOACHIMIĄK. *Department of Plant Cytology and Embryology, Jagiellonian University, ul. Grodzka 52, 31-044 Cracow, Poland, Tel./Fax: +48-12-422 81 07, e-mail: a.joachimiak@iphils.uj.edu.pl*

Plant genetics and cytogenetics; molecular phylogeny; sex determination; somaclonal variation

BENGT E. JONSELL. *Bergius Botanic Garden, Box 50017, S-104 05 Stockholm, Sweden, e-mail: bengtj@bergianska.se*
Plant taxonomy; biosystematics; plant geography

ANNA KOLTUNOW. *CSIRO Plant Industry, PO Box 350, Glen Osmond, SA 5064, Australia, e-mail: anna.koltunow@csiro.au*
Plant reproduction, developmental biology – particularly seed and fruit (cellular and molecular aspects)

JOLANTA MAŁUSZYŃSKA. *Department of Plant Anatomy and Cytology, Silesian University, ul. Jagiellońska 28, 40-032 Katowice, Poland, e-mail: maluszyn@us.edu.pl*
Plant cytology; cytogenetics

ELISABETH MATTHYS-ROCHON. *RDP, ENS Lyon, 46 Allée d'Italie, 69364 Lyon Cedex 07, France, e-mail: ematthysrochon@free.fr*
Plant gametes; pollination; cellular and molecular aspects of fertilization; in vitro development

MARIA OLSZEWSKA. *Department of Cytogenetics and Plant Molecular Biology, University of Łódź, ul. Banacha 12/16, 90-237 Łódź, Poland, e-mail: olszewsk@biol.uni.lodz.pl*
Plant cytochemistry and cytogenetics

MARIA PAJĄK. *Department of Plant Cytology and Embryology, Jagiellonian University, ul. Grodzka 52, 31-044 Cracow, Poland, Tel./Fax: +48-12-422 81 07, e-mail: m.pajak@iphils.uj.edu.pl*
Plant embryology; apomixis

JAN J. RYBCZYŃSKI. *Botanical Garden – Center for Biological Diversity Conservation of the Polish Academy of Sciences, ul. Prawdziwka 2, 02-973 Warsaw, Poland, e-mail: jjryb@ob.neostrada.pl*

Plant tissue and organ culture; biotechnology; cryopreservation

BARBARA SKUCIŃSKA. *Department of Plant Breeding and Seed Science, The Agricultural University of Cracow, ul. Łobzowska 24, 31-140 Cracow, Poland*

Plant tissue and organ culture

MICHIEL T. M. WILLEMSE. *Laboratory of Plant Cell Biology, Wageningen Agricultural University, Arboretumlaan 4, 6703 BD Wageningen, The Netherlands, e-mail: mtm.willemse@xs4all.nl*

Sexual plant reproduction; biology of lower plants

HONG-YUAN YANG. *Key Laboratory of MOE for Plant Developmental Biology, Wuhan University, Wuhan 430072, China, e-mail: hyyang@whu.edu.cn*

Experimental manipulation of sexual plant cells; cell and developmental biology; fertilization and embryogenesis

MACIEJ ZENKTELER. *Laboratory of General Botany, Institute of Experimental Biology, Adam Mickiewicz University, ul. Umultowska 89, 61-614 Poznań, Poland, e-mail: maczen@amu.edu.pl*

Experimental embryology; plant tissue and organ culture

12th National Conference '*In vitro* Cultures, Poznań 2009'

Integrating biotechnology, molecular
biology and agronomic practice
through *in vitro* cultures

September 9–11, 2009, Poznań, Poland

Patronage:

Rector of the Adam Mickiewicz University of Poznań

Conference organized by:

Department of General Botany, Adam Mickiewicz University, Poznań, Poland

Faculty of Biology, Adam Mickiewicz University, Poznań, Poland

Tissue Culture Section of Polish Botanical Society

Polish Academy of Arts and Sciences – Commission of Morphology and Embryology,
Cracow, Poland

Honorary Committee:

Bronisław Marciniak

Rector of Adam Mickiewicz University, Poznań, Poland

Bogdan Jackowiak

Dean of the Faculty of Biology, Adam Mickiewicz
University, Poznań, Poland

Jerzy Wyrozumski

Secretary General of the Polish Academy of Arts and
Sciences, Cracow, Poland

Szczepan Biliński

Pro-Rector of the Jagiellonian University and Chairman
of the Commission of Morphology and Embryology of
Polish Academy of Arts and Sciences, Cracow, Poland

Scientific Committee:

Anna Bach

Agricultural University of Cracow,
Department of Ornamental Plants, Cracow Poland

Krystyna Bojarczuk

Polish Academy of Sciences,
Institute of Dendrology, Kórnik, Poland

Teresa Cegielska-Taras

Institute of Plant Breeding and Acclimatization,
Poznań, Poland

Franciszek Dubert

Polish Academy of Sciences, Institute of Plant
Physiology, Cracow, Poland

Ewa Łojkowska

University of Gdansk, Department of Biotechnology
and Medical University of Gdańsk, Gdańsk, Poland

| | |
|-------------------------------|-------------------------------------------------------------------------------------------------------|
| Jan Kępczyński | University of Szczecin, Department of Plant Physiology, Szczecin, Poland |
| Elżbieta Kuta | Jagiellonian University, Department of Plant Cytology and Embryology, Cracow, Poland |
| Stefan Malepszy | University of Life Sciences, Department of Plant Genetics, Breeding and Biotechnology, Warsaw, Poland |
| Jolanta Małuszyńska | Silesian University, Katowice, Poland |
| Teresa Orlikowska | Research Institute of Pomology and Floriculture, Skierniewice, Poland |
| Jan J. Rybczyński | Polish Academy of Sciences, Botanical Garden, Warsaw, Poland |
| Aurelia Ślusarkiewicz-Jarzina | Polish Academy of Sciences, Institute of Plant Genetics, Poznań, Poland |
| Jan Szopa | University of Wrocław, Department of Genetic Biochemistry, Wrocław, Poland |
| Tomasz Twardowski | Polish Academy of Sciences, Institute of Bioorganic Chemistry, Poznań, Poland |
| Przemysław Wojtaszek | Adam Mickiewicz University, Department of Molecular and Cellular Biology, Poznań, Poland |
| Adam Woźny | Adam Mickiewicz University, Department of General Botany, Poznań, Poland |
| Maciej Zenkteler | Adam Mickiewicz University, Department of General Botany, Poznań, Poland |

Organizing Committee:

| | |
|-------------------------------|--------------------------------------------------------------------------|
| Maciej Zenkteler | Adam Mickiewicz University, Department of General Botany, Poznań, Poland |

ACTA BIOLOGICA CRACOVIENSIA

Series Botanica

CONTENTS

Volume 51, suppl. 1, 2009

Lectures

- S. Malepszy – Plant biotechnology and *in vitro* culture – the fulfilled hopes? 12
- T. Orlikowska, P. Sobiczewski, E. Zenkteler – What's new in the control of bacterial contamination in plant tissue cultures? 12
- K. Skórkowska-Telichowska, M. Żuk, A. Kulma, A. Bugajska- Prusak, K. Ratajczak and J. Szopa – FlaxAid, a new wound dressing based on transgenic flax products 13
- T. Twardowski – GMO – A.D. 2009 13
- P. Wojtaszek, E. Rodakowska, A. Kasprowicz, A. Szuba, D. Kierzkowski, P. Zawadzki, M. Maruniewicz, M. Wierzchowiecka, A. Kapczyńska, I. Kosicka, M. Michalak – Biology of cell wall-plasma membrane-cytoskeleton continuum in plants 14

Oral presentations

- T. Cegielska-Taras, I. Bartkowiak-Broda – Integration of *in vitro* culture, biotechnology and molecular biology in modern breeding of oilseed rape 16
- A. Czubacka, T. Doroszewska – Obtaining tobacco double haploids containing different sources of resistance to PVY 16
- M. Gliwicka, S. Balazadeh, C. Caldana, B. Mueller-Roeber, M. D. Gaj – The use of multi-qPCR platform and *tan1* mutant in identification of TF genes involved in somatic embryogenesis in *Arabidopsis* 17
- K. Głowacka, S. Jeżowski – *In vitro* culture of *Miscanthus sinensis* anthers 17
- K. L. Janczur, A. Obarska, P. Kachlicki, B. Tomaszewska – *In vitro* selection of varieties and lines of *Brassica napus* L. resistant to multiple heavy metals 18
- R. Konieczny, M. Libik, E. Surówka, A. Nosal, Z. Miszalski – Enzymatic markers of rhizogenic competence in *in vitro* culture of common ice plant 18
- K. Kromer, A. Raj, B. Wojtuń, D. Poturała – Use of biotechnology for conservation of a critically endangered population of alpine saxifrage (*Saxifraga nivalis* L.) 19
- E. Kuta, J. Rojek, A. Pawełek-Skoczylas, B. Ślązak, J. Bohdanowicz – Autonomous endosperm induction in cultured unpollinated ovaries is strongly species dependent 19
- A. Mikuła, J. J. Rybczyński – Liquid nitrogen efficacy in protection of genetic stability in plant material 20
- J. Nowakowska – Application of genetically modified trees in forest plantations 20
- M. Pilarska, R. Konieczny, M. Tuleja, E. Kuta – Efficient plant regeneration of *Trifolium nigrescens* via somatic embryogenesis 21
- T. Pniewski, M. Bogusiewicz, K. Wyrwa, M. Czyż – HBV core antigen (HBcAg) as a plant-based prototype of therapeutic hepatitis B vaccine and a carrier for HBV preS epitopes 21
- P. M. Pukacki, M. Jarzabek, W. Józwiak, C. Lütz – Cryoprotective activity of thermal hysteresis protein in evergreen plants 22
- D. Raj, A. Kokotkiewicz, M. Łuczkiwicz – Influence of different culture strategies on growth and indolizidine alkaloid accumulation in *Securinega suffruticosa* shoot cultures 22

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| P. Sobiczewski – Bacteria in plant environment | 23 |
| K. Szczygieł – Somatic embryogenesis of selected coniferous tree species | 23 |
| W. Szypuła, J. Budziszewska, D. Delbani – <i>In vitro</i> culture of endophytic fungi as a potential source of a novel biologically active secondary metabolites | 24 |
| K. Tomiczak, J. J. Rybczyński – Cytological, cytometric and molecular characterization of gentian somatic hybrids | 24 |
| A. Trojak-Goluch, A. Depta, M. Agacka – Induction of tetraploids in hop (<i>Humulus lupulus</i> L.) using <i>in vitro</i> cultures | 25 |
| A. Wiszniewska, A. Pindel – Is that really a step forward in protoplast culture of lupins? | 25 |
| M. K. Wojciechowicz – Anti-mitotic agents in <i>Salix viminalis</i> polyploid plant induction | 26 |
| A. Wojciechowski, J. Janowicz, M. Stanisławska – The effect of genotype, explant type and medium on the regeneration of linseed (<i>Linum usitatissimum</i> L.) in <i>in vitro</i> culture | 26 |
| A. Wójcik, J. J. Rybczyński – <i>Agrobacterium</i> – mediated genetic transformation of <i>Gentiana tibetica</i> King | 27 |
| M. Zalewska, N. Miler – Topophysis in adventitious shoots regeneration <i>in vitro</i> in <i>Chrysanthemum</i> | 27 |
| M. Zawadzka, T. Orlikowska, P. Sobiczewski, A. Mikiciński, M. Sulikowska, E. Zenkteler – The control of bacterial contaminations during <i>in vitro</i> shoot multiplication | 28 |
| E. Zenkteler, P. Sobiczewski, T. Orlikowska, K. Langer, J. Langer – Application of nanomaterials to fight and prevent bacteria <i>in vitro</i> | 28 |
| M. Zenkteler – Some remarks on the application of <i>in vitro</i> techniques to manipulation of sexual reproduction of plants | 29 |
| J. Zimny, S. Oleszczuk, A. Z. Czaplicki, H. Woś, J. Kozdój, S. Sowa, P. Bednarek – Application of androgenesis in basic research and breeding of cereals | 29 |
| M. Żuk, J. Szopa – Increase of bioactive compounds in flax plants overexpressing enzymes of flavonoid synthesis pathway | 30 |

Posters

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| E. Andrzejewska-Golec, J. Makowczyńska – Micropropagation of <i>Plantago coronopus</i> L. | 32 |
| M. Arendt, R. Galek, E. Sawicka-Sienkiewicz – <i>In vitro</i> cultures of embryonic axes of <i>Lupinus mutabilis</i> and <i>L. albus</i> | 32 |
| A. Bach, B. Pawłowska, K. Hura – The effect of the exogenous phenolic compound, caffeic acid on organogenesis in <i>Galanthus elwesii</i> Hook. cultured <i>in vitro</i> | 33 |
| A. Boba, A. Kulma, K. Kostyn, J. Szopa – Changes in terpenoid level after <i>Fusarium</i> treatment in flax | 33 |
| M. Bogusiewicz, T. Pniewski – Expression of HBV core antigen (HBcAg) in transgenic tobacco and lettuce for purposes of therapeutic vaccine against hepatitis B | 34 |
| A. Budzianowska, J. Budzianowski – Phenolic compounds in shoot and callus cultures of <i>Plantago ovata</i> Forssk. | 34 |
| M. Bultrowicz, R. Mól – The use of pollen tube <i>in vitro</i> cultures for determination of nuclei positions in angiosperm pollen tubes | 35 |
| A. Chuda, A. Adamus – Molecular analysis of interspecific <i>Allium cepa</i> × <i>A. roylei</i> hybrids | 35 |
| J. Ciszewska-Marciniak, M. Jędryczka, J. Przyborowski, E. Zenkteler – Two year survey on health status of <i>Salix</i> × <i>Populus</i> hybrids in Warmia region | 36 |
| A. Z. Czaplicki, S. Oleszczuk, J. Zimny – Albino regenerants from isolated microspores of wheat | 36 |
| D. Czarnecka, A. Czubačka, T. Doroszewska – Optimization of the regeneration method of <i>Miscanthus</i> × <i>giganteus</i> in <i>in vitro</i> culture | 37 |
| T. Czuj, M. Żuk, J. Szopa – Changes in sulfur amino acid contents in flax caused by overexpression of yeast Met25 gene lead to an increase in antioxidant capacity and <i>Fusarium</i> resistance | 37 |
| J. Durok, E. Grzebelus, M. Szklarczyk – Phytosulfokine stimulates development of sugar beet (<i>Beta vulgaris</i> L.) mesophyll protoplasts | 38 |

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| K. Floryanowicz-Czekalska, J. J. Rybczyński – <i>Gentiana cachemirica</i> Decne in <i>in vitro</i> culture | 38 |
| E. Gabryszewska, L. Kawa-MiszczaK – Rooting <i>in vitro</i> and acclimation to the greenhouse of herbaceous peony plantlets | 39 |
| M. Gliwicka, M. D. Gaj – Expression pattern of <i>ABH1</i> , <i>CBP20</i> and <i>HYL1</i> genes during somatic embryogenesis in <i>Arabidopsis</i> | 39 |
| K. Górecka, D. Krzyżanowska, U. Kowalska, W. Kiszczak, R. Górecki – Obtaining plants from gametic embryos of red beet – preliminary investigations | 40 |
| K. Górecka, D. Krzyżanowska, U. Kowalska, W. Kiszczak, R. Górecki – Yacon – <i>in vitro</i> propagation trials | 40 |
| E. Grzebelus, M. Grabka – The effect of cefotaxime and carbenicillin on carrot protoplast cultures | 41 |
| E. Grzebelus, M. Gładysz, E. Widlarz, D. Grzebelus – Cytological and molecular variation of carrot regenerants obtained through <i>in vitro</i> selection of carrot protoplasts against <i>Alternaria radicina</i> | 41 |
| I. Grzegorzczak, H. Wysokińska – Micropropagation of <i>Scutellaria altissima</i> L. | 42 |
| T. Hazubska-Przybył, P. Chmielarz, M. Michalak, K. Bojarczuk – Induction and proliferation of embryogenic tissues of Serbian spruce (<i>Picea omorika</i>) and their maintenance in liquid nitrogen | 42 |
| A. Jagielska – Identification of European and Japanese larches and their hybrids based on genetic markers | 43 |
| A. KasproWicz, A. Szpitter, A. Maciejewska, M. Kamiński, E. Łojkowska, A. Królicka – <i>In vitro</i> cultures of <i>Drosera binata</i> as a source of compounds with antimicrobial activity | 43 |
| A. Kawiński, J. Znanięcka, E. Łojkowska – Genetic diversity within population of endangered species <i>Cypripedium calceolus</i> | 44 |
| A. Kielkowska, A. Adamus – Morphological evaluation of interspecific F1 (<i>Allium galanthum</i> × <i>A. cepa</i>) hybrids | 44 |
| M. Kikowska, B. Thiem – Characteristic of the cell suspension culture of <i>Eryngium planum</i> L. | 45 |
| A. Kisiała, A. Niklas-Nowak, M. Orlińska, P. Nowaczyk – <i>In vitro</i> androgenic response of some pepper (<i>Capsicum</i>) genotypes to different levels of kinetin | 45 |
| M. Klimek, R. Barański – Influence of the ploidy level on growth and organogenesis of sugar beet (<i>Beta vulgaris</i> L.) <i>in vitro</i> | 46 |
| J. Klocek, G. Costa, H. MioduszeWska – A study of the influence of humic substances on <i>in vitro</i> potato growth and tuberization | 46 |
| K. Kostyn, M. Czemplik, A. Boba, A. Kulma, J. Szopa – Genes involved in flax pathogenesis | 47 |
| K. Kozak, R. Galek, E. Sawicka-Sienkiewicz – Induced androgenesis in anther culture of <i>Lupinus angustifolius</i> | 47 |
| A. Krajewska-Patan, M. Dreger, M. Górski-Pauksztka, A. Mścisz, S. Mielcarek, M. Baraniak, W. Buchwald, M. Furmanowa, P. M. Mrozikiewicz – Enhancing of salidroside and rosavin production in <i>Rhodiola kirilowii</i> callus cultures | 48 |
| H. Kruczkowska, H. Pawłowska, B. Skucińska – Comparison of micropropagation methods of Polish cultivars of barley and oat | 48 |
| K. Kuźdowicz, M. Goška – Shoot regeneration of perennial wild beet species <i>in vitro</i> | 49 |
| I. Kwiecień, K. Bień, H. Ekiert – Biotransformation of p-hydroxybenzoic acid in <i>in vitro</i> cultures of <i>Ruta graveolens</i> ssp. <i>divaricata</i> | 49 |
| I. Kwiecień, S. Zubek, H. Ekiert – Studies of the biotransformation of p-hydroxybenzoic acid in <i>in vitro</i> cultures of <i>Ruta graveolens</i> | 50 |
| A. Luwanska, G. Mankowska, K. Wielgus – Artificial seeds of <i>Linum usitatissimum</i> L. and <i>Morus alba</i> L. in long-term storage under slow growth conditions | 50 |
| M. Ładyżyński, J. J. Rybczyński – Regeneration of <i>Gentiana cruciata</i> from <i>in vitro</i> shoot tip culture | 51 |
| D. Makowski, A. Mikuła, J. J. Rybczyński – Cryobank of gametophytes of tropical woody fern species | 51 |
| M. Malik, B. Stawiarz – Somatic embryo formation in callus cultures of <i>Narcissus</i> L. 'Carlton' multiplied in liquid media | 52 |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| G. Mańkowska, A. Luwańska, K. Wielgus – The analysis of cell ploidy level in the explant tissue culture of hemp (<i>Cannabis sativa</i> L.) and flax (<i>Linum usitatissimum</i> L.) | 52 |
| I. Marcińska, E. Skrzypek, I. Czyczyło-Mysza, A. Stawicka, M. Pilipowicz – Does a relationship between the frequency of androgenesis and vernalization requirement exist in wheat? | 53 |
| B. Muszyńska, K. Sułkowska-Ziaja – Analysis of indole compounds in <i>Calocera viscosa</i> mycelium cultured on liquid medium and in its fruiting bodies | 53 |
| P. Nowaczyk, L. Nowaczyk – Conversion – the critical point of induced embryogenesis in <i>Capsicum</i> spp. | 54 |
| A. Obarska, K. L. Janczur, B. Tomaszewska – Shoot induction potential of nine <i>Brassica napus</i> varieties and two types of explants | 54 |
| T. Orlikowska, D. Kucharska, K. Klamkowski, M. Horbowicz, L. Lahuta – Is it possible to select drought-resistant <i>Rubus</i> genotypes from <i>in vitro</i> populations of seedlings or adventitious shoots? | 55 |
| M. Ożarowski, B. Thiem – The effect of cytokinins on <i>in vitro</i> morphogenesis of <i>Passiflora caerulea</i> L. | 55 |
| B. Pawłowska, A. Bach – Cryopreservation of <i>in vitro</i> grown shoot buds of rose 'New Dawn' using encapsulation-dehydration method | 56 |
| A. Płażek, F. Dubert – Optimization of medium for callus induction and plant regeneration of <i>Miscanthus × giganteus</i> | 56 |
| B. Płoszaj, J. Przyborowski – Initiation of an <i>in vitro</i> culture of elder (<i>Sambucus nigra</i> L.) meristems with the use of various sterilizers | 57 |
| B. Płoszaj, J. Przyborowski – The effect of kinetin content in the culture medium on micropropagation of elder (<i>Sambucus nigra</i> L.) | 57 |
| M. Podwyszyńska, A. Kuras, M. Korbin – ISSR analysis of genetic stability of Polish tulip cultivars propagated <i>in vitro</i> | 58 |
| M. Podwyszyńska, E. Gabryszewska, M. Korbin, A. Jasiński – Evaluation of somaclonal variation in micropropagated <i>Hemerocallis</i> sp. plants using phenotype and ISSR markers | 58 |
| A. Ponitka, A. Ślusarkiewicz-Jarzina, J. Woźna, H. Pudelska – Frequencies of spontaneous doubled haploids of winter triticale plants obtained by anther culture | 59 |
| M. Popielarska-Konieczna, M. Braś, K. Rzenno, M. Łojewski, I. Marcińska – Isolation and <i>in vitro</i> culture of endosperm tissues in selected monocot and dicot species | 59 |
| A. Ptak, J. Gądek – Micropropagation of <i>Leucojum aestivum</i> in a temporary immersion bioreactor system (RITA) | 60 |
| D. Raj, A. Kokotkiewicz, A. Skorys, M. Łuczkiwicz – Preliminary analysis of polyphenolic fraction from intact plant and <i>in vitro</i> cultures of <i>Securinega suffruticosa</i> | 60 |
| M. Rojek, M. Dydak, J. Kwasniewska, K. Walas, E. Wolny, K. Nowak, J. Małuszynska – <i>Agrobacterium rhizogenes</i> serves cytogenetics | 61 |
| M. Rokicki, A. Wojciechowski – Use of wide crossing and <i>in vitro</i> culture for the induction of haploid embryogenesis in three cereal species | 61 |
| E. Skrzypczak-Pietraszek, J. Pietraszek – Phenolic acids in <i>in vitro</i> cultures of <i>Exacum affine</i> Balf. f. | 62 |
| E. Skrzypek, I. Marcińska, A. Stawicka, I. Czyczyło-Mysza, M. Pilipowicz – Induction of androgenesis in oat (<i>Avena sativa</i> L.) depending on kind of culture medium | 62 |
| D. Sochacki – Evaluation of phenotypic trueness-to-type for selected cultivars of narcissus propagated by <i>in vitro</i> cultures | 63 |
| A. Stojakowska, J. Malarz – Methyl jasmonate and fosmidomycin affect mono- and sesquiterpenoid production in root cultures of <i>Inula royleana</i> DC. and <i>Inula macrocephala</i> Boiss. & Kotschy ex Boiss. | 63 |
| K. Sułkowska-Ziaja, B. Muszyńska – Mycelial cultures of some <i>Aphyllphorales</i> (<i>Basidiomycetes</i>): optimization of <i>in vitro</i> culture conditions | 64 |
| L. Szała, A. Olejnik, T. Cegielska-Taras – Molecular characterization of resynthesized oilseed rape (<i>Brassica napus</i> L.) | 64 |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| M. Sztajnert, K. Ratajczak, A. Kulma, J. Szopa – Anti-inflammatory properties of transgenic flax fiber extract | 65 |
| M. Szurman, M. Gliwicka, M. Gaj – Effect of 5-azacitidine on DNA methylation pattern and somatic embryogenesis in <i>Arabidopsis</i> | 65 |
| W. Szypuła, J. Budziszewska, D. Delbani – Identification of culturable and non-culturable endophytic fungi isolated from shoots of <i>Huperzia selago</i> (L.) Bernh. ex Schrank & Mart. (<i>Lycopodium selago</i> L.) | 66 |
| H. Ślesak, G. Góralski, P. Mizia, D. Kwolek, A. Joachimiak – Plant regeneration from liquid root culture of <i>Rumex acetosa</i> L. Analysis of genetic variability: preliminary studies | 67 |
| J. Tarwacka, A. Szczerbakowa, B. Wielgat – Cytogenetic characteristics of the interspecific somatic hybrids of <i>Solanum villosum</i> (+) <i>S. tuberosum</i> | 67 |
| B. Thiem, M. Kikowska, I. Paluch – Bioactive secondary metabolites in <i>in vitro</i> cultures of <i>Eryngium alpinum</i> L. | 68 |
| M. Tomaszewska-Sowa – The regeneration of sugar beet (<i>Beta vulgaris</i> L.) plants from unfertilized ovules cultured <i>in vitro</i> | 68 |
| A. Trejgell, A. Tretyn – The effect of cytokinins on morphogenetic responses of <i>Polemonium caeruleum</i> seedling explants | 69 |
| A. Trojanowska, M. D. Gaj – Capacity for shoot organogenesis in cultures of <i>Arabidopsis</i> hormone-response mutants | 69 |
| A. Turczynowska, Z. Broda – Evaluation of regeneration efficiency of selected double haploid lines of rape (<i>Brassica napus</i> ssp. <i>oleifera</i>) | 70 |
| M. Wajand, A. Ledwon, M. D. Gaj – Efficient shoot organogenesis induced in the culture of immature zygotic embryos of <i>Arabidopsis</i> | 70 |
| M. Warchoł, F. Dubert, T. Kusibab – <i>In vitro</i> culture of <i>Cordyline australis</i> (G. Forst) Endl. | 71 |
| I. Weremczuk-Jeżyna, H. Wysokińska – <i>In vitro</i> culture of <i>Dracocephalum moldavica</i> | 71 |
| A. Wojtania, E. Gabryszewska – Influence of growth regulators and environmental factors on shoot multiplication of <i>Camellia japonica</i> <i>in vitro</i> | 72 |
| W. Wojtasik, K. Kostyn, A. Kulma, J. Szopa – Pectin metabolism in <i>Fusarium</i> -infected flax seedlings | 72 |
| T. P. Wyka, K. Ludwiczak – Regeneration of shoots from root explants in <i>Mammillaria carmenae</i> Castañeda (Cactaceae) | 73 |
| Ł. Zarychta, M. Zenkteler, A. Karmowska, E. Zenkteler – Intergeneric hybridization between <i>Salix fragilis</i> and <i>Populus</i> spp. <i>in vivo</i> and <i>in vitro</i> | 73 |
| M. Zawadzka, T. Orlikowska – The influence of iron source in red raspberry cultures on the chlorophyll contents and histology of the leaves | 74 |
| P. Zelazko, K. Kromer – <i>In vitro</i> reproduction of <i>Drosera rotundifolia</i> and conservation plant genetic resources of this species | 74 |
| A. Żróbek-Sokolnik, C. Hołdyński, K. Górską-Koplińska – Propagation of <i>Chamaedaphne calyculata</i> (L.) Moench via indirect somatic embryogenesis | 75 |
